---

## APPLICATIONS

**Volunteer Manager** | [Github repository](#) | [Link to deployed site](#)

- ❑ App focused on having full CRUD capabilities. Emphasized breaking down API calls, routing, and controllers. The app was built after experience working in the nonprofit world and seeing a need for better systems to serve that sector.
- ❑ **Technologies used:** { React, Javascript, Bootstrap, JSX, Node.js, Express, MongoDB, Mongoose }

**Portfolio Page** | [Github repository](#) | [Link to deployed site](#)

- ❑ Used a grid-based layout system via Bootstrap rows and columns. Experienced significant growth in styling skills while building this website and now have a better understanding of how to approach styling moving forward.
- ❑ **Technologies used:** { React, Javascript, JSX, Bootstrap, CSS }

**News Scrubber** | [Github repository](#) | [Link to deployed site](#)

- ❑ First deployed app using MongoDB in conjunction with Express. Researched and implemented [NewsAPI.org's](#) API by following the documentation.
- ❑ **Technologies used:** { React, Javascript, Bootstrap, JSX, Node.js, Express, MongoDB, Mongoose }

**Authentication App** | [Github repository](#) | [Link to deployed site](#)

- ❑ Grasped the flow of data and security make up of authentication by learning Passport.js and Bcrypt.
- ❑ **Technologies used:** { Javascript, jQuery, Node.js, SQL, Sequelize, Passport.js, Bcrypt, Handlebars }

**Burger Bar with Sequelize** | [Github repository](#) | [Link to deployed site](#)

- ❑ First deployed app using SQL in conjunction with Express.
  - ❑ **Technologies used:** { Javascript, jQuery, Node.js, SQL, Sequelize, Handlebars }
  - ❑ **Same Burger Bar app without the ORM sequelize** | [Github repository](#) | [Link to deployed site](#)
-
